

## Pricing

### **Initial Evaluation**

**\$275.00.**

Why an evaluation? To best serve your child, we need a better idea of where they've been and where they're heading! Our evaluations consist of a 3-part process that provide us a comprehensive understanding of your child strengths, weaknesses, challenges and successes. The evaluation will first begin with 30-45 minutes of parent and participant consultation to gather health and prior therapy history, as well as to determine participant's current level of functioning in their daily lives. The next step is a 15-20 minute assessment within the therapeutic space to assess participant's overall abilities and to establish the level of assistance needed within the setting. Finally, your therapist will sit down with your family to collaboratively set goals for the next 6 months and will provide recommendations as needed. Your child will receive a full write up with the results of the initial evaluation within one week, as well as a Parallel Play shirt to wear to the gym!

### **Re-evaluation**

**\$140.00**

Includes 30 minutes of treatment/assessment, 20 minutes of consultation with family to determine progress on existing goals and to update goals as needed. An updated write up will be provided within a week of re-evaluation. \*Required every 12 months\*
